ZX55 ZX60 ZX60X

WHY THE NEED FOR ZX?

As crime becomes more and more sophisticated, so must the ways of foiling it. Anyone who has invested heavily in a vehicle asset needs to protect that investment, of course, but to protect it far further than the range of choices which criminals have available to them. There is no point in being the weak link in the crime chain.

Hence - the Sanji Intellica ZX55/60/60X Pro Series.

Arguably now the most advanced immobilizer in the world, the ZX55/60/60X is a culmination of years of research by Sanji engineers - utilising the very latest techniques available to date. The ZX55/60/60X is manufactured to the highest International ISO9001 Quality Standards. Each unit has to pass its own series of stringent quality control tests in order to get the exemplary ZX stamp of approval. The ZX55/60/60X represents the extreme cutting edge in vehicle security design.

Intelligence is a matter of thinking and Sanji do this exceptionally well - thinking of the best car protection systems for each situation out-thinking criminals. In the area of hi-tech security you can always leave the thinking to Sanji.

Every day countless cars are hijacked. The ZX60 anti-hijack facility immobilises your vehicle if it is forcibly taken from you. The beeper (optional siren) immediately sounds a warning and indicators flash, informing the hijacker that the car will immobilize after 90 seconds.
